

Julian Garcia-Abadillo, PhD

University of Florida - Agronomy Department | Gainesville, FL, US

+1 (352)721-5243 | Work: garciaabadillo.j@ufl.edu | Personal: es2juliangarciaa@gmail.com

Google Scholar | ResearchGate | ORCID | Github | LinkedIn

Research Interests

My research focuses on applying statistical methods to agricultural problems, mostly within the plant breeding field. I am particularly interested in using quantitative genetics and its statistical foundation for trait prediction in academic research, paired with the industry machine learning paradigm and its focus on real-world applicability and scalability.

Current lines of my research explore multi-omics datasets (including genomic, pedigree, weather, and phenomic records) for phenotypic prediction and genotype-by-environment pattern identification. Additionally, I work on developing methodologies to select optimal information sources for training better models and implementing non-linear procedures to predict dynamic, time-related traits.

Keywords: *Quantitative Genetics, Plant Breeding, Statistics, Data Science, R and python programming, Genomic Selection, Genome-wide Association Studies (GWAS), Machine Learning, Artificial Intelligence, Data Visualization, Genotype-by-Environment Interactions, High-Throughput Computing, Multi-omics Integration*

Education

PhD. Quantitative Genetics

09/2021 – 12/2025

Technical University of Madrid (UPM) – Center for Plant Biotechnology and Genomics (CBGP)

PhD Advisor: Dr. Julio Isidro y Sánchez

Dissertation: *Machine Learning Approaches Applied to Genomic-Assisted Plant Breeding*

MSc. Artificial Intelligence

09/2020 – 07/2021

Technical University of Madrid (UPM) – School of Computer Engineering (ETSIInf)

Thesis Advisors: Dr. Alfonso Mateos Caballero & Dr. Antonio Jiménez Martín

Thesis: *Modeling the Propagation of a Disease Using Graph Theory and Phone Mobility Data*

BSc. Biotechnology

09/2016 – 07/2020

Technical University of Madrid (UPM) – School of Agricultural, Food & Biosystems Engineering (ETSIAAB)

Thesis Advisors: Dr. Patricia Giraldo Carbajo & Dr. Laura Pascual Bañuls

Thesis: *Identification of Genomic Regions Involved in Wheat Root Development*

Work Experience

University of Florida

Gainesville, FL, US

Research Assistant

09/2024 – 02/2025 | 08/2025 – present

Supervisor: Dr. Diego Jarquín

My duties at UF involve providing quantitative genetics and statistical support for various projects and collaborations related with plant breeding and tree orchard management programs. Additionally, I advise MS and PhD students and serve as a TA and guest lecturer.

Google LLC

Mountain View, CA, US

AI/Plant Biology PhD Resident

01/2024 – 07/2024

Supervisor: Dr. Tim Beissinger

As a PhD Resident at Google, I reported to the technical lead of the project. I led independent research initiatives, leveraging Google's proprietary data and computational infrastructure to deliver insights for client companies. My role involved producing and reviewing python and R code for data science pipelines, providing scientific and statistical guidance to software engineers and translating research findings into summaries for leadership.

Publications

Peer-Reviewed Papers

I have authored or co-authored 16 peer-reviewed papers (4 as first author).

1. **Garcia-Abadillo**, J., Isidro Sánchez, J., Jarquin, D., Galeano, E., & Thomas, B. R. (2026). Prediction of conelet mortality rates in interior lodgepole pine using phenomic, nutritional, and environmental data. *Frontiers in Plant Science*, 17, 1845181.
2. **Garcia-Abadillo**, J., Adunola, P., Aguilar, F., Trujillo-Montenegro, J., Riascos, J., Persa, R., Sanchez, J., & Jarquin, D. (2024). Sparse testing designs for optimizing predictive ability in sugarcane populations. *Frontiers in Plant Science*, 15, 1400000.
3. **Garcia-Abadillo**, J., Barba, P., Carvalho, T., Sosa-Zuniga, V., Lozano, R., Carvalho, H., Garcia-Rojas, M., Salazar, E., & Sanchez, J. (2024). Dissecting the complex genetic basis of pre-and post-harvest traits in *Vitis vinifera* L. using genome-wide association studies. *Horticulture Research*, 11(2), uhad283.

Impact of season variability and soil types on Genotype × Environment (G×E) interaction on lettuce cultivated under low phosphorus rates. Manuscript in preparation.

Scientific Communications

Talks

I have delivered 6 invited/conference talks (5 conference presentations and 1 keynote address).

1. *The importance of data quality*. Conference on Applied Statistics in Agriculture and Natural Resources, Gainesville, FL, US. **May 11, 2025**
2. *Integration of multi-omics for phenotypic prediction in plant breeding*. XXXII Plant and Animal Genome Conference, San Diego, CA, US. **Jan 10, 2025**
3. *Phenotypic prediction of abortion rate in lodgepole pine using non-genetic multi-omics datasets*. Alberta Forestry Industry Meeting, Edmonton, AB, Canada. **Nov 16, 2024**

4. *Integrating machine learning in the plant breeding toolbox: Benefits and challenges.* **Nov 11, 2024**
ASA, CSSA & SSSA International Annual Meetings, San Antonio, TX, US.
- Integration of multi-omics and other interactions in predictive models* [Keynote address]. **Oct 02, 2024**
5. VIII International Meeting on Plant Breeding: AI for Scientific Breakthrough: Applications and Innovations, Piracicaba, Brazil.
6. *Integration of multi-omic datasets and their interactions into predictive models: A tree species example.* **Nov 07, 2023**
II GxExM Symposium, Gainesville, FL, US.

Poster Sessions

I have presented 4 posters at scientific conferences.

- Beyond Cross-Validation in Genomic Selection: Extracting Insights from Non-Validatable Forward Predictions with CHiDO.* **Jun 15, 2026**
National Association of Plant Breeders conference, College Station, TX, USA.
- AgroPower. Monte Carlo Power Analysis for Complex Agronomic Experimental Designs.* **Jan 20, 2026**
10th Annual University of Florida Plant Science Symposium, Gainesville, FL, USA.
- Predicting without genomics using CHiDO: A multi-omics case study in trees.* **May 19, 2025**
National Association of Plant Breeders conference, Kona, HI, USA.
- Evaluation of Fusarium Head Blight resistance by alternative methods for genomic assisted breeding.* **May 11, 2022**
XVIIIth Eucarpia Biometrics in Plant Breeding Conference, Paris-Saclay University, Gif-sur-Yvette, France.

Funding and Academic Awards

• Google University Program Relocation Stipend	2024	12,000 USD
• Complementary Visiting Scholar Fundings	2023	3,077 EUR (Approx. 3,500 USD)
• Santander-UPM Visiting Scholar Fundings	2023	4,900 EUR (Approx. 5,600 USD)
• Santander-UPM Q1 Article Publishing Fee Fundings	2023	3,000 EUR (Approx. 3,400 USD)
• Santander-UPM 4-year PhD Fundings	2022	75,000 EUR (Approx. 86,000 USD)
• Spanish Government's Undergraduate Research Stipend	2020	2,000 EUR (Approx. 2,300 USD)
• Community of Madrid Academic Excellence Award	2019	2,100 EUR (Approx. 2,400 USD)
• Community of Madrid Academic Excellence Award	2018	2,100 EUR (Approx. 2,400 USD)
• Community of Madrid Academic Excellence Award	2017	2,100 EUR (Approx. 2,400 USD)

Travel Awards

• National Association of Plant Breeders Conference <i>Agronomy Department (University of Florida)</i>	2025	Kailua-Kona, HI, US
• Conf. on Applied Statistics in Agriculture and Natural Resources <i>Agronomy Department (University of Florida)</i>	2025	Gainesville, FL, US
• 32nd Plant & Animal Genome Conference <i>Edwardson Agronomy Endowment (University of Florida)</i>	2025	San Diego, CA, US
• ASA-CSSA-SSSA International Annual Meeting <i>Agronomy Department (University of Florida)</i>	2024	San Antonio, TX, US
• 8th International Meeting on Plant Breeding <i>Corteva Agriscience Plant Sciences Symposia Series</i>	2024	Piracicaba, Brazil
• Alberta Forestry Industry Meeting <i>Department of Renewable Resources (University of Alberta)</i>	2023	Edmonton, AB, Canada
• Multi-omics Integration and AI short Course at CIAT <i>Agronomy Department (University of Florida)</i>	2023	Cali, Colombia

Teaching Experience

Short Course Instructor

- **IV Multi-Omic Integration for AI Genomic Prediction Breeding** **Jul 6-10, 2026**
Malachowsky Hall for Data Science and Information Technology, Gainesville, FL, US
Main instructor: Dr. Diego Jarquin
 - G×E Prediction Models using Weather Data
 - AI Methods I: Introduction to Machine Learning and Semiparametric Methods
 - AI Methods II: Nonparametric ML methods: Deep Learning & Random Forests
 - Sparse Testing Designs
 - Multi-omics Integration using CHiDO
- **III Multi-Omic Integration for AI Genomic Prediction Breeding** **Jul 7-11, 2025**
Malachowsky Hall for Data Science and Information Technology, Gainesville, FL, US
Main instructor: Dr. Diego Jarquin
 - Introduction to R and HiperGator
 - G×E Prediction Models using Weather Data
 - AI Methods I: Introduction to Machine Learning and Semiparametric Methods
 - AI Methods II: Nonparametric ML methods: Deep Learning & Random Forests
 - Sparse Testing Designs
 - Multi-omics Integration using CHiDO
- **II Multi-Omic Integration for AI Genomic Prediction Breeding** **Jul 15-19, 2024**
Straughn IFAS Extension Professional Development Center, Gainesville, FL, US
Main instructor: Dr. Diego Jarquin
 - Introduction to R and HiperGator
 - AI Methods I: Machine Learning and Kernel Methods
 - AI Methods II: Deep Learning and its Application in Plant Breeding
- **Multi-Omic Integration Short Course** **Nov 2-3, 2023**
Centro Internacional de Agricultura Tropical (CIAT), Cali, Colombia
Main instructor: Dr. Diego Jarquin
 - AI Methods I: RKHS & Deep Learning
 - AI Methods II: Random Forests

Workshop Assistant

- **Multi-Omics Integration for Applied Prediction, Concepts, Foundations, and Strategies** **May 12, 2025**
2025 Conference on Applied Statistics in Agriculture and Natural Resources
Main instructor: Dr. Diego Jarquin

Guest Lecturer

- **AGR6932: Multi-Omic Integration for Applied Prediction Breeding** **Fall 2024**
University of Florida — Agronomy Department
Main instructor: Dr. Diego Jarquin
Two lectures on Overfitting and Model Complexity (theory and practice)

Teaching Assistant

- **AGR6932: Multi-Omic Integration for Applied Prediction Breeding** **Fall 2024**
University of Florida — Agronomy Department
Main instructor: Dr. Diego Jarquin
- **D260-203000026: Genomic-Assisted Breeding [Graduate Level]** **Fall 2022**
Technical University of Madrid (UPM), Spain — Biotechnology & Plant Biology Department

Main instructor: Dr. Julio Isidro

- **D260-205000015: Genetics [Undergraduate Level]** **Fall 2022**
Technical University of Madrid (UPM), Spain — Biotechnology & Plant Biology Department
Main instructor: Dr. Estela Gimenez

Computer Skills

- **DevOps & Version Control:** Git, GitHub
- **Computer Programming:** UNIX shell scripting, R, Python, SQL
- **Parallel Computing:** HTC/HPC platforms (HiPerGator-UF, Kairos-UPM), slurm
- **Cloud Computing:** Google Cloud Platform (Computing & Storage), VertexAI
- **Operating Systems:** Windows, macOS, Linux
- **Data Science:** scikit-learn, pandas, numpy, seaborn, tidyverse, dplyr, ggplot2
- **Web Development:** HTML, CSS, Django, Shiny
- **Desktop Editing:** Microsoft Office, LaTeX, Inkscape

Professional Development

- **Innovation and Technology Transfer Course** **Apr-May, 2024**
Centre for Biotechnology and Plant Genomics – Madrid, Spain
Main instructor: Dr. Antonio Molina
Duration: 20 hours
- **Multi-Omic Integration for AI Genomic Prediction Breeding Under Different Approaches: Past, Present and Future (Short Course)** **Jul 10-14, 2023**
University of Florida - Gainesville, FL, US
Main instructor: Dr. Diego Jarquin
Duration: 25 hours
- **Phenomic Selection (Conference Workshop)** **Sep 20, 2022**
Paris-Saclay University - Gif-sur-Yvette, France
Main instructor: Dr. Rincent Renaud
Duration: 5 hours

Software Development

- **CHiDO** (R Shiny app) — Author & Maintainer Demo | Docs
- **bayesammi** (CRAN package) — Contributor Docs

Professional Memberships

- National Association of Plant Breeders **May 2025 - Present**

Editorial Activities

Journal refereeing

- The Plant Genome **8 manuscripts**
